Power Supply: 220-240V 50Hz
Consumption: 0,200 KW/24h

Certifications: CE, EMC, LVD, CB

DIFFERENT OPERATING MODES AVAILABLE, TO MATCH ANY DEMAND

Standard mode: Cold Icon operates on a fix temperature setpoint, @ +4°C.

Eco mode: the compressor goes into standby mode, to allow the integrated cold energy storing system to keep beverages at the right temperature. This happens from 11:30PM to 5:30AM, allowing an overnight silent operation.

Sleep mode: the compressor goes into standby for one our, then returns to the previous setpoint.

Quick chill mode: the compressors runs continuously for 5 hours, to return to the previous setting at its end.
